

AOF

BEGINNER ROADMAP

START MMA AT HOME

A practical guide to striking foundations, physical preparation and responsible solo practice.

USE THIS GUIDE TO DECIDE

What belongs at home, what needs correction, and when a coach, partner or gym becomes necessary.

START HERE

A map for responsible practice

The roadmap organizes the territory and helps you make better starting decisions. It does not diagnose technique or replace qualified supervision.

THE CENTRAL QUESTION

What can a beginner start at home, and when do coach feedback, a partner or a gym become necessary?

Before each session

- Clear a stable, non-slip space and remove nearby hazards.
- Use a comfortable pace. Stop if a movement causes pain or feels unsuitable.
- Keep new technical work within what a qualified coach has taught or approved.
- Choose one focus. Do not add speed, power or extra combinations when control is uncertain.

EDUCATIONAL AND SAFETY DISCLAIMER

This roadmap is for general educational and informational purposes only. It is not medical advice, diagnosis or treatment and does not replace qualified coaching, professional supervision or individual assessment. Physical activity and combat-sport practice involve injury risk. Train within your abilities in a safe space. Stop for pain, dizziness, chest discomfort, unusual shortness of breath or other concerning symptoms and seek appropriate medical advice. Results are not guaranteed.

01 - THE WHOLE MAP

Six areas. One starting decision.

The six areas work together, but they do not all belong in the same training situation.

01

Understanding and observation

Learn the language of MMA and watch with purpose.

02

Technical foundations

Build selected basics in a sensible order.

03

Physical preparation

Support practice through mobility, balance, coordination, strength and conditioning.

04

Practice and feedback

Repeat with attention, review the attempt and correct one issue.

05

Mindset and consistency

Use a realistic schedule and avoid all-out training.

06

Recovery and daily support

Protect readiness through rest, hydration and practical routines.

02 - RESPONSIBLE BOUNDARIES

Alone, with a coach, and in a gym can coexist

These are training situations, not levels. The task decides where it belongs.

ALONE

Selected solo practice

- Observation and self-learning.
- Controlled foundations learnt.
- Simple physical preparation and routine.

LIMIT: No live resistance and no self-certification.

WITH A COACH

Instruction and correction

- Technical teaching and demonstration.
- Visible review and correction.
- Progression decisions.

LIMIT: Remote feedback does not create partner resistance.

GYM OR PARTNER

Timing, resistance and application

- Partner timing and resistance.
- Grappling and contact drills.
- Supervised sparring.

LIMIT: A partner alone does not replace qualified guidance.

03 - BUILD IN ORDER

The striking pathway

A conceptual sequence based on the approved workshop direction. It is not the Program's day-by-day curriculum and does not teach technique by text.

1 POSITION

Stance and guard

Build a stable starting position before chasing variety.

2 MOVE + RETURN

Controlled movement and reset

Keep posture and guard while moving, then recover.

3 STRAIGHT LINE

Straight punches and basic links

Add simple attacks without sacrificing the base.

4 DEFEND + RESPOND

Defense and controlled response

Connect selected defenses to a simple response.

5 ADD KICKS

Selected kicks and punch-kick links

Add them after the base remains controlled.

6 INTEGRATE

Structured shadowboxing

Combine learned material without losing control.

PROGRESSION PRINCIPLE

**Foundation before complexity. Control before speed or power.
Isolated skills before integration.**

04 - PRACTICE AND FEEDBACK

Six stages in order

Progress comes from a repeatable learning process. More techniques and harder rounds do not replace review and correction.

01 Learn

Understand one taught foundation.

02 Controlled practice

Repeat slowly enough to keep the task clear.

03 Review

Observe a short attempt or recording.

04 Correction

Address one coach-selected correction point.

05 Repetition

Repeat the corrected version.

06 Later integration

Combine only after the foundation remains controlled.

05 - FEEDBACK

Self-review has a useful limit

You can only spot correction points you already understand. Coach feedback can reveal what self-review misses.

WHY COACH FEEDBACK MATTERS

Self-review can only use what you already understand. A coach can identify an unseen mistake, select the correction and decide whether to simplify or progress.

SELF-REVIEW CAN NOTICE

- Your starting position.
- An obvious loss of balance.
- Whether you returned to guard.
- Whether the task stayed controlled.

COACH FEEDBACK CAN ADD

- A correction you did not recognize.
- A more suitable next step.
- A decision to simplify or progress.
- Context that video alone cannot provide.

06 - EXAMPLE GUIDANCE

Mobility

General roadmap options rather than the Program's lesson plan.

WHY IT MATTERS

Support comfortable joint positions without forcing range.

EXAMPLE OPTIONS

Ankle rocks, hip switches, thoracic rotations, shoulder circles and gentle squat holds.

A SIMPLE STARTING FORMAT

Use one or two easy rounds. Move comfortably and stop well before pain.

CAUTION Avoid aggressive stretching, bouncing or forcing a joint.

07 - EXAMPLE GUIDANCE

Balance

Use stable support whenever the task requires it.

WHY IT MATTERS

Control the body while holding, shifting or briefly unloading one side.

EXAMPLE OPTIONS

Split-stance holds, supported single-leg balance, heel-to-toe walking, slow knee-lift holds and controlled weight shifts.

A SIMPLE STARTING FORMAT

Use short holds or slow passes on each side near a wall or chair.

CAUTION

Keep the area clear. Do not practise unstable challenges near hazards.

08 - EXAMPLE GUIDANCE

Coordination

Keep the task simple enough that posture and space awareness remain intact.

WHY IT MATTERS

Connect simple limb actions and rhythms without rushing.

EXAMPLE OPTIONS

Opposite hand-knee taps, line-step patterns, slow shadowboxing counts, rhythm changes and wall-ball catch.

A SIMPLE STARTING FORMAT

Use short rounds of 20 to 40 seconds with a full reset between attempts.

CAUTION

Simplify the pattern when posture or control disappears. This does not replace partner timing.

09 - EXAMPLE GUIDANCE

Strength

Physical preparation supports practice. It does not teach striking technique.

WHY IT MATTERS

Build general force through stable, repeatable movement patterns.

EXAMPLE OPTIONS

Chair squats, wall or incline push-ups, supported split squats, glute bridges, calf raises and dead bugs.

A SIMPLE STARTING FORMAT

Choose two to four suitable patterns. Use controlled sets and leave repetitions in reserve.

CAUTION

Avoid grinding repetitions or adding load without appropriate guidance.

10 - EXAMPLE GUIDANCE

Cardio and conditioning

Build capacity without turning every session into exhaustion.

WHY IT MATTERS

Develop a general aerobic base and prepare for repeat efforts while preserving control.

EXAMPLE OPTIONS

Brisk walking, easy cycling, step-ups, low-impact marching and controlled shadowboxing intervals.

A SIMPLE STARTING FORMAT

Increase duration before intensity. Use short work periods and enough recovery to keep quality visible.

CAUTION

Fatigue should not erase technique. Stop for pain, dizziness or unusual breathlessness.

11 - READINESS

Recovery supports tomorrow's practice

Rest and daily routines affect the quality of technical learning. Recovery does not need to become another hard workout.

A SIMPLE READINESS CHECK

How do you feel, what did you practise recently, and can you stay controlled today?

Sleep and hydration

Protect the routines that make focused practice easier.

Comfortable mobility

Use gentle movement to restore range without forcing it.

Easy aerobic activity

Use a walk or another conversational effort when it supports recovery.

Pain or unusual symptoms

Stop and seek appropriate professional advice when needed.

12 - SESSION STRUCTURE

A clear 30 to 40-minute practice

This sample format matches the Program's approved core-session range. The example contents remain general guidance.

**01**

Arrive

2-3 min

Clear the space. Check readiness. Choose one focus.

02

Warm up

5-7 min

Raise temperature gradually and prepare the patterns you will use.

03

Foundation

5-7 min

Rehearse stance, guard and controlled resets.

12 - SESSION STRUCTURE

Build, integrate, then close

Keep the later blocks connected to material that has already been taught and reviewed.

04 Skill practice

10-12 min

Practise one taught foundation or simple link.

05 Integration

4-6 min

Use controlled shadowboxing only with material already learned.

06 Cool down and note

4-5 min

Lower the effort, move comfortably and record one observation.

QUALITY CHECK If the focus disappears, reduce speed, complexity, range, round length or fatigue.

13 - CONSISTENCY

One foundation, not a new technique every day

This rhythm shows how practice, physical preparation and recovery can coexist. It remains an example, not a fixed curriculum.

A**Foundation practice**

One taught foundation and one review question.

B**Easy cardio and mobility**

Conversational effort and comfortable movement.

C**Repeat and review**

Revisit the foundation. Correct one identified issue.

D**Strength and balance**

Use suitable patterns with repetitions left in reserve.

13 - CONSISTENCY

Continue without chasing variety

The week closes by integrating learned material, adjusting to readiness and reviewing what needs feedback.

E

Controlled integration

Use learned material in simple shadowboxing.

F

Easy activity or rest

Choose according to readiness.

MISSED A DAY?

Return to the next sensible session or ask for guidance. Do not double the workload to catch up.

14 - WEEKLY FRAMEWORK

Plan one realistic week

A recommended solo-training planning tool, not a fixed curriculum. Choose what you can repeat, then review the week before deciding what comes next.

01

Practice schedule

Choose the number of sessions and set a day and time for each one.

02

Technical focus

Choose one learned foundation to practise consistently through the week.

03

One physical preparation

Choose one suitable mobility, coordination, balance, strength, cardio or conditioning action.

04

One support habit

Choose one habit that makes solo practice easier to begin and repeat.

05

Review

Note what you completed, what felt clearer and what you will repeat or adjust next week.

15 - DIRECTION AND EXECUTION

The roadmap solves confusion. Guidance solves the next-step problem.

A roadmap gives direction. Guided execution adds the next lesson, technical correction and a sequence you can continue.

COMMON PAIN POINTS

- Too many random videos.
- No clear first step.
- Uncertainty about what belongs at home.
- No reliable way to spot unseen mistakes.
- Difficulty staying consistent.

WHAT GUIDANCE ADDS

- The next lesson.
- A clear order of foundations.
- Coach correction.
- A sequence that continues after one session.
- Cohort support and follow-up.

THE DECISION

Use the roadmap to organize your own practice, find an appropriate gym, or choose a guided striking path when you want exact sequencing and technical feedback.

The roadmap remains useful whether or not you choose the Program.

AOF

OPTIONAL GUIDED PATH

AOF 30-DAY MMA STRIKING PROGRAM

For beginners who want a Tamil-first sequence, 30 to 40-minute core sessions, coach feedback and cohort support.

A GOOD FIT IF YOU WANT

- A clear next lesson.
- Ordered striking foundations.
- Coach correction on submitted practice.
- A cohort starting on 5 October 2026.

THIS DOES NOT PROMISE

- Complete MMA training.
- A gym replacement.
- Live sparring or fight preparation.
- Guaranteed transformation.
